Tree Fruit Automation and the Regional Labor Market

As almost anyone in north central Washington can observe, automation and robotics have been moving in on the local tree fruit operations. Across the nation, and right here in our own backyard, the industry is changing the way tree fruit laborers are utilized in everyday operations, from harvest, to packing and inspection, to distribution. Dr. Nadreau's research evaluated the projected timelines and relative impacts of this transformation on the tree fruit agricultural workforce in North Central Washington.

FEBRUARY 5, 2020 | 4:00PM - 5:00PM
WSU TREE FRUIT RESEARCH & EXTENSION CENTER
1100 N. Western Avenue, Wenatchee WA 98801

Join us for a casual social after the presentation! Meet us at 509 Bierwerks in Wenatchee at 5:30pm for food and drinks (family friendly). This is a great chance to connect further with speakers, educators, scientists, students and the community.
